

Robotics Days with Mr Hyett – Thursday 6th and Friday 7th September

Year 3 had a fantastic day with Mr Hyett learning how to build and program robots! They started by building a simple snail robot and they programmed it to make the light flash. By the end of the day they were able to build really complicated robots including earthquake makers and spy robots. The children programmed their robots to move in different ways, make sounds and flash different colours. They all worked really hard to complete as many robots as possible to get points. Well done to Ryan for getting the most points and completing the mechanical claw challenge!
