

# Year 4 Robotics Day 2018

On Thursday 6<sup>th</sup> September the children in Year 4 spent the day with Mr Hyett, one of our school governors, using Lego to build a programmable robot.

This was a great opportunity for the children to develop their collaborative skills as they worked in groups of three to first of all follow instructions to build their robots and then programme them. I pads were used both for the instructions and as a way of programming the robots. During the course of the day the children were able to earn points depending on how well they constructed their robots without help and how well they were able to achieve each goal for programming. It was a great learning experience for the children and we would like to thank Mr Hyett for giving them this opportunity. Mr Hyett runs holiday clubs which focus on the use of ICT and is hopefully going to run an afterschool club here at St. Paul's too so look out for further information about this soon.
